

Management StartUP

Calculate your business loan

Calculation of Business Loan Parameters

TOOL MANUAL
FN06

ABOUT US

The staff of Online Management Solutions Ltd is trained on providing services for establishing and developing new entrepreneurial activities, as well as providing online services for businesses, and especially the media.

Our Vision

The website managementstartup.com was created by Online Management Solutions Ltd.

It stands as one of our first creations and it focuses on developing and providing research tools that can help people who are close to their entrepreneurial startup.

Management Startup was created by people with a high educational level and vast experience in the field of research and development of new tools for entrepreneurship.

GENERAL DESCRIPTION

The tool "FN06. Calculation of business loan parameters" helps us to calculate all parameters of a business loan that you have chosen or will choose, such as:

- Monthly installment
- Total payment amount
- Total interest to be paid
- The monthly installment that is absorbed for the payment of interest
- The monthly installment that is absorbed for the payment of capital

It also allows us to compare between different repayment terms of a loan (different lengths, different interest rates, etc.). In this tool, those considered favorable are the terms with which we achieve the lowest total payments.

Finally, through the search function of the target value of the tool we can set our own repayment terms of the loan (in the amount of the monthly installment) and calculate the corresponding total repayment period (number of monthly installments), the total payments and the total interest payable.

In the event that we are considering taking a loan to start up a business, the results of the tool take even greater importance as it is necessary that the loan will be taken to "meet" your needs.

TOOL USAGE

The tool "FN06. Calculation of parameters of business loan" is proposed to be used both by the entrepreneur himself and by the financial department of the company.

Type of business

Startups
New Ventures
Existing Companies
Consultans
Training Organisations
